Bow Rider, has always been the synonym of a dynamic and fun boat.

So why not create a rib that combines the already dynamic and sporty concept of the bow rider with the even more appealing one of a rigid inflatable boat !?

It is only thanks to an in-depth research and development phase that Cantieri Capelli is proud to offer this great innovation in the nautical world.

Capelli Tempest BR 65, is not a simple rigid inflatable boat, wants to impose itself as a starting point to a new boat concept.

Designed by the technical department and development of Cantieri Capelli, the unit has been thought for everyday use. The simplicity of management, the compact size, the sporty setting, make Capelli Tempest BR 65 the ideal boat for relaxing with the family, for water sports or for day cruises.

Its attractive design and modern lines, made sporty by the coloring in grey livery, will catch your eye from the first moment.
