- Engines max: 225 HP (1 XL)
- Propulsion : Outboard
- Homologation: in progress
- Weight (approx.): 1050 kg
- Fabric: ORCA NEOPRENE HYPALON 1670 dtex

Cantieri Capelli keeps on refreshing the sizes of models in its line-up, choosing to launch a new TEMPEST 700, a model that has obtained great success in these years

Deck lines are refreshed and updated, starting from a big stern integrated platform (STD), thought to guarantee an easy access on board.

New stringers line, as well as a new console and bench are in line with the modern evolution of the whole tempest line, started with the new TEMPEST 1000 open, launched last year.

The stern bench backrest can be moved fore and backwards to allow a multiple seating choice

The driving bench has an integrated wooden table and a comfortable steering seat with a flip up system.

The console is much more captivating and modern with an in-built fore bench.

The fore area is confirmed in size and wideness, thanks to the cushion sunbathing extension. The GRP bow pylon completes the bow setting.

The STD SS A-frame has also been updated, typified by a much more modern line and design.
